

District 12 Tour: Orion Energy

February 10, 2012

Founded in 1996, Orion Energy Systems is an industry leader in supplying energy management systems, renewable energy strategies and asset management products designed to reduce energy consumption up to 50% or more. To date, Orion's products have saved its customers billions of dollars in energy costs.

The AWS District 12 will be touring Orion's 266,000 square foot factory, a model of energy efficient manufacturing. Orion features state-of-the-art equipment and proprietary processes, including multiple cell CNC, turret punch presses, servo electric forming and integrated robotics.

Following dinner, District 12 Director Daniel Roland will give a brief presentation.
