

Weld Fume Awareness Seminar

October 14, 2025 8:00am-3:00pm **OR**

October 15, 2025 8:00am-3:00pm

Location: 4030 W Lincoln St, Phoenix, AZ 85009

Join Miller® and Linde on October 14th or 15th as industry experts share how to best approach some of the most common weld fume management challenges faced in the industry today.

Key Discussion Topics and Takeaways:

- How to identify and assess weld fume particulate within your work environment
- How to mitigate risk following OSHA's Hierarchy of Controls, considering the most feasible and effective solution to determine an action plan
- Short and long term benefits in controlling weld fume particulate in your work environment
- Factors that can impact operator exposure
- Hands on demonstrations of product solutions that help reduce fume generation rates and exposure levels

Keynote Speakers

Ana Maldonado

Certified Industrial Hygienist

Ana is a Certified Industrial Hygienist with over 24 years of experience. She has worked with ADOSH for 19 years and currently serves as a consultant.

Leland Wittman

Certified Industrial Hygienist

He is a Certified Industrial Hygienist with over 25 years of management experience. He now serves as the Consultation-Education-Training Supervisor for the Phoenix area office, bringing extensive expertise as an industrial hygienist and being cross-trained in both safety and health OSHA standards.

Did you know?

#4 Respiratory Protection

OSHA's 2024 Top Ten Most Cited Violations is 1910.134(c)(1) - Establishing and implementing a written respiratory protection program.¹
