

## AWS Central Texas District 17 Meeting 11/26/2024

### Ultra Clean Technologies

November 26, 2024, we held our district meeting and tour at Ultra Clean Technology. Charles Gatlin led the tour. 23 members attended the meeting. It was started by Thomas Hinkle stating our mission and doing roll call. Reports by officers and new business was addressed. Charles Gatlin gave us a very informative tour of the facility, the function, type of welding and inspection required by their business. Ultra Clean Technologies is in the process of building a new facility which will double their size. They plan to hire 50 new welders and more inspectors as soon as they move. It was great to see new opportunities for welders and inspectors in our area.
