

JOHNSTOWN / ALTOONA SECTION AMERICAN WELDING SOCIETY

American Welding Society

DATE: November 4th, 2025 (Tuesday)
TIME: 4:30PM – 6:00PM

LOCATION: 4 Guys Fire Trucks
230 Industrial Park Rd.
Meyersdale, PA 15552

SUBJECT: Company presentation & Facility tour

In 1974 four local men with ties to the dairy industry started a business repairing stainless steel milk tankers. Shortly after 4 Guys was established, the company solicited new investors and shifted to building fire apparatus.

At first, the company built elliptical tankers based on their original milk tanker design. Soon, satisfied customers started coming back, asking for other types of equipment. The original building has been enlarged five times. Additions include a new paint booth, a truck finishing area, office areas and inspection bays. The plant now covers more than 30,000 square feet, and the staff has more than doubled over the years to around 70 employees.

4 Guys Fire Trucks marked its 50th anniversary in 2024 and regards itself as a regional builder, consistently producing between 50 and 60 pieces of apparatus annually and boasting yearly sales in excess of \$23 million.

Please join us for an insightful presentation and tour of 4 Guys Inc. showcasing their engineering, design, welding and fabrication capabilities, and career opportunities. Non-members, Students and any interested 4 Guys personnel are welcome to attend.

* Note that production will not be operating at the time of this meeting, so no safety gear is required.

***** Food & refreshments will be provided *****

RESERVATIONS:

Contact one of the Section Officers listed below to reserve your spot no later than **Wednesday, October 29th, 2025.**
